

What are the priorities in rehabilitation as seen from the point of view of an nmd-parent with a healthy child?

By Jakobsen, Maria Overgaard

My name is Maria Overgaard Jakobsen and I am 35 years old. I have lived my life with the knowledge of having a neuromuscular disorder since I was 8 years old. Today I live a quite normal life with my husband and my child and I have a job as a social worker. I will tell about my thoughts and my feelings when I got pregnant and I will tell about how I manage to be a mother to a little child, when I could not carry him myself or do the other practical things with a baby.

Today my son is 11 years old and he is a healthy boy with a lot of interests.
